## 11+ Entrance information and materials

It is assumed that candidates are following the Year 6 Programme for Study of Mathematics, available via the DfE website
(https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment dat a/file/335158/PRIMARY_national_curriculum_-_Mathematics_220714.pdf start page 39)

If any unfamiliar notation is used it will be fully explained in the question. Some of the questions near the end of the paper are intended to be of an original nature so may seem unfamiliar to students but will draw from mathematical thinking skills being developed in Primary Schools.

## MATHEMATICS <br> (1 hour)

## Instructions to Candidates

1. Write your name at the top of this question paper
2. Try all of the questions. Do not spend too much time on any one question go on to the next.
You can go back to a question if you have time at the end.
3. Show all necessary working in the space provided. DO NOT RUB OUT ANY WORKING unless you wish to change it.
4. Answers should be written on the answer line provided.
5. Do not write anything in the margins.
6. Calculators are not allowed.

| 7 | Helen buys seven tins of cola and she <br> receives $£ 4.05$ change from $£ 10$. How <br> much does one tin of cola cost? Give your <br> answer in pence. | In a new office building there are 80 doors <br> and each door is fastened by 3 hinges. If <br> each hinge requires 5 screws, what is the <br> total number of screws required to fit all <br> the doors? |

17 This L shape has one line of symmetry and was made by removing a square from a corner of a square piece of card. What is the area of the L shape?

## Not to scale

Use this space for your working to part c.

The diagram shows the points
A $(1,2)$ and $B(0,8)$
a) Add, and label the point C $(7,8)$ onto the diagram.
b) If ABCD is a kite, with AC as the line of symmetry, plot the point D on the diagram and write down its coordinates below.

Answer D ( $\qquad$
c) Calculate the area of the kite ABCD . The scale is 1 unit to 1 cm , so give your answer in $\mathrm{cm}^{2}$.

Answer $\mathrm{cm}^{2}$

19 This calculation is correct:
$257 \times 368=94576$
Use this result to answer these questions:
(a) $2.57 \times 3.68$
(b) $0.257 \times 368$
Answer: $\qquad$
Answer: $\qquad$
(c) $25.7 \times 3680$
(d) $9457.6 \div 2570$
Answer $\qquad$
Answer: $\qquad$

20 a) In the space on the right, draw a quadrilateral (four sided shape) that has exactly two pairs of parallel sides and no right angles.
b) In the space on the right, draw a pentagon that has one reflex angle, two right angles and one line of symmetry.

21 Here is a right angled triangle inside a rectangle. Calculate the value of angle $\mathbf{x}$.
Do not use a protractor or angle measurer, the diagram is not to scale.

4 Answer
22 A jar with 5 chocolates in it has mass 185 g and the same jar with 17 chocolates in it has mass 317 g .
What is the mass of the jar with 10 chocolates in it?

23 The buddy of a number is the found by doubling the number and subtracting the result from 24. e.g. the buddy of 9 is $24-18=6$
a) Find the buddy of 13 .

Answer: $\qquad$
b) Find the number whose buddy is 19

6 Answer: $\qquad$ Answer: $\qquad$
24 Silvia makes a sequence of four numbers finishing with 80.
She gets the next number in the sequence by multiplying by $\mathbf{3}$ and adding 2 each time.
Find the three numbers that come before 80 in her sequence.
$\qquad$
$\qquad$

Simon makes a sequence of numbers starting with 284.
To get the next number, he divides by 4 and then adds the same amount each time.
The second number is 76 .
Write down the next two numbers in his sequence.
28476

Eric makes a sequence of five numbers starting with 107.
He subtracts the same amount each time. His last number is $\mathbf{3 5}$.
Write down the missing three numbers in his sequence.
$\qquad$
$\qquad$ 35
